DETAILED ACTION

1. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to **Group Art Unit 1648**.
2. Claims 1-127 are pending.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-40 and 53-127, drawn to a method of preventing, treating or ameliorating an RSV infection, classified in class 435, subclass 5.
 - II. Claims 41-53, drawn to a pharmaceutical composition comprising antibodies that bind immunospecifically to one or more RSV antigens, classified in class 424, subclass 130.1.

If Applicant elects Group I, further restriction is required.

- Claim 12, 27, 40, 85, 121 – Election of one of the antibodies is required. These antibodies have different amino acid sequences in their variable domains, requiring separate sequence searches.
- Claim 111 - Election of one antibody construct (one sequence from each CDR) is required. A separate search is required for each sequence and is therefore burdensome.

If Applicant elects Group II, further restriction is required.

Art Unit: 1648

- Claim 49, 50, – Election of one of the antibodies is required. These antibodies have different amino acid sequences in their variable domains, requiring separate sequence searches.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using such as in an assay for detecting RSV antigen.

Because these inventions are distinct for the reasons given above and the literature and sequence search required one group is not co-extensive for any other group, and therefore burdensome, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
